

## • TIMOTHY MAGEE

**Traits:** meticulous, calm, diplomatic, analytical, information-seeking, and skilled at problem-solving

In 2019, I began a brief course in HTML and CSS, which led me to create a WordPress website for four associations, becoming the person in charge of the website. Subsequently, I shifted my focus from social work studies to frontend programming at Change Maker Education in Stockholm. From my studies, I've learned HTML, CSS, JavaScript, TypeScript, React and Git, as well as Express and SQL

Currently, I am undertaking my internship at two non-profit organizations, Sverok and MÄN, where I primarily work on the backend, am a team leader and occasionally act as the IT responsible.

When you hire me, you'll get a responsible team member who isn't afraid to tackle challenging tasks and is always eager to learn more.
