

TIMOTHY MAGEE

Uppsala, Sweden | +46734432697 | timabloom@proton.me | linkedin.com/in/timothymagee

Summary

As a Frontend Developer with a fondness for backend intricacies, I am deeply committed to transforming challenges into solutions. Each obstacle I have come across has been an invitation to innovate, and I have consistently risen to the occasion. While confident in my skills, I remain humble and ever-eager to learn. I value teamwork and feedback, always aiming to contribute effectively to any web development team.

Skills

- Responsive Web Design
- Wireframes
- Content Management
- Backend Development
- Databases
- Web Security & Encryption
- Version Control Systems
- WordPress
- Website Maintenance
- SEO
- Web Design Technologies
- Agile/Scrum Methodology
- Analytical Thinking
- Avid Learner
- Creativity and Innovation

Experience

Full Stack Developer Intern Viktor Lindberg – Stockholm

Feb 2023 to Jul 2023

- Engineered RESTful API endpoints using Express, integrating it with a SQLite database through Prisma to manage and retrieve data efficiently.
- Deepened my grasp on web security principles, ensuring protection for data and user credentials. Implemented encryption techniques to help prevent exposure if data leaked out.
- Employed TypeScript to introduce type safety, enhancing code quality, maintainability, and reducing potential runtime errors.
- Oversaw the design, writing, and production of website content, ensuring it catered to both project requirements and user expectations.
- Assumed a leadership role, directing and collaborating closely with a team to ensure project milestones were met and quality was maintained.
- Maintained regular communication with the project leaders to ensure website and backend functionalities aligned with project objectives and requirements.

WordPress Website Administrator [Malma Backe Residential Area](#) – Uppsala

Apr 2020 to Ongoing

- Successfully migrated relevant data from the old Joomla platform to the newly created WordPress website.
- Integrated multiple plugins to address and fulfill residential requirements and enhance website functionality.
- Proactively managed website updates, ensuring the platform remained up-to-date and secure.
- Handled website security concerns, implementing measures to safeguard against potential vulnerabilities.
- Implemented a website backup system to safeguard critical data and ensure recoverability in case of unforeseen issues or data loss.
- Served as the primary point of responsibility for the entire website, providing support and assistance as necessary.

Projects

Web Developer and Designer

May 2023 to Ongoing

[Tarot Sanctuary](#) – Personal Project

- Deepened my proficiency with SvelteKit, an emerging frontend meta-framework, for improved performance and SEO.
- Invested in learning and applying design principles and implemented them in Figma, resulting in an aesthetically pleasing and user-friendly interface.
- Adopted modern compression techniques, utilizing the WebP format for images to enhance web performance and reduce load times.

Education and Training

Higher Vocational Education Diploma, Frontend / App Developer

Sep 2021 to Jul 2023

[Change Maker Educations](#) – Stockholm
